

Dear Parents,

Here are a few recommendations for the purchase of your child's device. Please note that these recommendations will enable us to unify tools in the classroom, so that we can properly install any software that your child may need to work with in class.

Please note that technical support may be more difficult with MAC computers as certain software may not be compatible. In addition, if your child may eventually need an educational plan that includes the use of a device, you should consider a PC.

### **For a computer**

#### **IBM compatible computer (Windows-based)**

Operating system: Windows 10 (home or pro)

Processor I3, I5, I7, or AMD Ryzen 5 and up

8 GB of RAM

SSD 256 GB minimum

#### **MAC computer**

MacBook Air or MacBook Pro 2012 and up

8 GB of RAM

256 GB SSD and more.

*\* Ideally, please avoid Chromebook style computers.*

### **For an iPad**

**iPad with keyboard (mandatory)** and a protective case

10.2" 128 GB

Don't forget that your child will also need **a pair of headphones**, and that their device must be carried to school each day in a secure manner.
