

Dear Parents,

Today's world is constantly changing, and technology has become an integral part of our children's reality, as well as our own daily lives. In Cycle 2, we feel that it is important to familiarize children with technology by teaching them how to use it properly. It is for this reason that we intend to integrate these tools into our teaching methods in a reasonable and calculated manner. In addition, in the event of a new pandemic situation, whereby classes would be held from a distance again, we would like to continue teaching all subjects virtually on a daily basis.

In class, technology allows us to offer additional exercises and enrichment activities on various educational sites, create PowerPoint documents for oral presentations, and use a keyboard efficiently while teaching students to be good digital citizens. It is understood that traditional teaching methods will always be present in class, however student autonomy and a variation of teaching methods will be used to engage students as much as possible in their learning.

To begin the next school year, we ask that your child bring their iPad (with keyboard) or laptop to class every day. A pair of headphones will also be required. Please find attached our recommendations to guide you in choosing which device is best for your child.

Thank you for your cooperation!

The Cycle 2 Teachers
